BM1700 Beach Cleaning Machine

BM1700 BEACH CLEANING MACHINE

THE FUNCTION OF THE MACHINE

This is a machine with its own engine, crawlers or rubber tires capable of cleaning sea shells, mussels, mosses, sticks and tree pieces, glass, metal pieces, medical waste, packaging waste, droppings, cigarette stubs, plastic bottles inside the sand as well as foreign matters on the beach, operating with a belt screen mechanism, which screens the sand and leave it on the beach, stores all the wastes in a separate litter container capable of unloading such litter into a garbage container by means of a hydraulic power system with a manual command.

- Sizes (length: 420 cm, width: 253 cm, height: 250 cm)
- Weight (2780 kg)
- Engine power (49,8 KW (66,8 HP) Diesel Engine)
- Beach Cleaning Sizes (cleans in a width of 160 cm and depth of 15 – 20 – 25 cm)
- Garbage Container Volume (1.2 m3)
- Garbage Container Unloading Height (225 cm)
- Machine's Speed on Road (12 km / hour) Cleaning Speed (0-50 mt/min– depending on the beach conditions)
- Cleaning Ability (0-12,000 m2/min–depending on the beach conditions)
- Fuel Tank (58 lt – diesel)
- Tire Size (400/60 – 15.5)
- Hydrostatic Driving System
- Hydraulic screening, garbage collection and unloading system
- Air-conditioned operator's cab with a backup camera
- Electric system current operating voltage (12 DCV)
